These versatile surfacemount and flushmount loudspeakers easily integrate into sound systems—indoors and outside—with flexible mounting hardware and optional installation accessories. Complete entire projects with a single family of Bose loudspeakers that deliver consistent highfidelity sound, installation methods and contemporary styling. This 16watt loudspeaker is designed to be flushmounted in ceilings up to 20 feet 6 m. It can also be hung from open ceilings with an accessory pendantmount kit. It meets numerous standards for combination music and evacuation systems around the world. This one provides the audio performance, installation flexibility and contemporary styling needed for a wide range of business music installations. The FreeSpace DS 16F flushmount loudspeaker was also created to be the counterpart to the DS 16S and DS 16SE surfacemount loudspeakers. The FreeSpace DS 16F is similar to the FreeSpace Model 16 in terms of performance and design. The dimensions are the same, and both are intended for the same applications. It can be flushmounted in solid or tile ceilings, and can be used in plenum airhandling spaces when installed with the PC16 plenum cover accessory. It can also be suspended from open ceilings with an accessory pendantmount kit. The loudspeaker is engineered for mounting heights up to 20 feet 6 m. After the hole is cut, attach the input wires to the rear loudspeaker terminals. If necessary, fasten a safety cable to the seismic tab on the rear of enclosure. Put the loudspeaker in the hole and tighten the three anchors with a screwdriver by turning the three screws marked with triangular arrows on the front baffle. After the loudspeaker is secured in the ceiling, adjust the tap setting as needed, and attach the grille. Insert the eye screws into the three inserts on the rear of the loudspeaker enclosure.http://drterrace.com/london-100.com/userfiles/concepto-de-manual-de-cargos-y-funciones.xml

Place the loudspeaker into the cosmetic cover and tighten the three loudspeaker anchors to secure the cover. Attach the suspension cables to the three eye screws and hang the entire assembly from the ceiling superstructure. It is compatible with the following optional accessories These connectors are designed to work with 18 AWG 0.8 mm to 14 AWG 2.0 mm size wire only. An optional ceramic terminal and thermal fuse kit accessory is available for use as required. Press and secure the grille back into place. This can be accomplished before or after loudspeaker installation. These shared qualities allow different DS models to be used throughout a facility to maintain a consistent sound quality and overall appearance. For wall mounting, a FreeSpace 3 Acoustimass module can be used with its surfacemount accessory kit. For ceiling mounting, a FreeSpace 3 Series II Acoustimass module can be flushmounted or pendantmounted using a pendantmount kit accessory. The grille is made of powdercoated steel. An optional steel back can accessory PC16 plenum cover is available to meet plenumrating for air handling spaces. However, performance can be maximized by using the recommended Bose loudspeaker equalization resident in select Bose electronics, or by using other equipment with parametric equalization. A highpass filter at 80 Hz is required for general use if the recommended equalization is not used. Detailed information about our product warranty is available on our website. Control Number 42S9. Not for use with DCsupervised systems Control Number 3N89. It is a highperformance, fullrange, flushmount The DS 16F features a Optional accessory

available for use when ceramic connector and thermal fuse are required. The Bose FreeSpace DS family is a line of highquality loudspeakers engineered to provide three distinct levels of audio performance for a wide range of background and foreground music applications. These versatile surfacemount and flushmount loudspeakers easily integrate into sound systems—indoors and outside—with flexible mounting hardware and optional installation accessories. Complete entire projects with a single family of Bose loudspeakers that deliver consistent highfidelity sound, installation methods and contemporary styling. What are the available tap settings. The included mounting bracket features a threeterminal barrier strip. These connectors are designed to work with 18 AWG 0.8 mm to 14 AWG 2.0 mm size wire only. The loudspeaker has a prewired connector that snaps into the bracket base to complete the wiring.Optional accessories can provide a ceramic connector and a thermal fuse for use when required. What is the FreeSpace DS 16F loudspeaker. The FreeSpace DS 16F is a highfidelity loudspeaker that reproduces background music and speech with clarity and detail for business applications. This 16watt loudspeaker is designed to be flushmounted in ceilings up to 20 feet 6 m. It can also be hung from open ceilings with an accessory pendantmount kit. It meets numerous standards for combination music and evacuation systems around the world. Why did Bose make the FreeSpace DS 16F loudspeaker. The product goal was to make a loudspeaker that meets the requirements of background music and paging applications. This one provides the audio performance, installation flexibility and contemporary styling needed for a wide range of business music installations. The FreeSpace DS 16F flushmount loudspeaker was also created to be the counterpart to the DS 16S and DS 16SE surfacemount loudspeakers. How does the DS 16F loudspeaker fit into the FreeSpace DS loudspeaker family.

The FreeSpace DS family offers models that provide three distinct levels of audio performance appropriate for different business music system applications DS 16 Background music, pagingDS 40 Background and foreground music, pagingDS 100 Foreground music, pagingDetailed information about the FreeSpace DS loudspeaker family can be found on page one of the FreeSpace DS loudspeaker family comparison guide. Is the FreeSpace DS 16F loudspeaker a replacement for another Bose loudspeaker Yes. The FreeSpace DS 16F replaced the FreeSpace Model 16. The FreeSpace DS 16F is similar to the FreeSpace Model 16 in terms of performance and design. The dimensions are the same, and both are intended for the same applications. For what types of venues is the FreeSpace DS 16F loudspeaker wellsuited. The FreeSpace DS 16F is wellsuited for retail stores, restaurants, hospitality venues, public spaces, offices, meeting rooms, hallways, entrance ways, lobbies and restrooms. Where can I install the FreeSpace DS 16F loudspeaker. It is designed for indoor installations in ceilings. It can be flushmounted in solid or tile ceilings, and can be used in plenum airhandling spaces when installed with the PC16 plenum cover accessory. It can also be suspended from open ceilings with an accessory pendantmount kit. The loudspeaker is engineered for mounting heights up to 20 feet 6 m.An optional square grille accessory is also available for installations in which a square grille complements the architecture and decor. How do I install the FreeSpace DS 16F loudspeaker. Cut an 8inch 203 mm hole in the ceiling or ceiling tile using the included template. Note The hole must be slightly bigger than the actual product diameter to ensure proper fit. The use of a tile bridge accessory is typically required for most tile ceiling applications to distribute the weight of the loudspeaker to the ceiling support structure. After the hole is cut, attach the input wires to the rear loudspeaker terminals.

If necessary, fasten a safety cable to the seismic tab on the rear of enclosure. Put the loudspeaker in the hole and tighten the three anchors with a screwdriver by turning the three screws marked with

triangular arrows on the front baffle. After the loudspeaker is secured in the ceiling, adjust the tap setting as needed, and attach the grille. How do I install the FreeSpace DS 16F loudspeaker using the pendantmount kit. The pendantmount kit accessory is required. Insert the eye screws into the three inserts on the rear of the loudspeaker enclosure. Place the loudspeaker into the cosmetic cover and tighten the three loudspeaker anchors to secure the cover. Attach the suspension cables to the three eye screws and hang the entire assembly from the ceiling superstructure. What comes in the box with the FreeSpace DS 16F loudspeaker. The FreeSpace DS 16F comes with a detachable round grille, an installation guide, a cutting template and a paint shield. What accessories are available for the FreeSpace DS 16F loudspeaker. The FreeSpace DS 16F uses many of the FreeSpace Model 16 accessories. It is compatible with the following optional accessoriesModel 16 tile bridge 6 pack PC 029830Model 16 roughin pan 6 pack PC 029831Model 16 retrofit kit 6 pack PC 030096PC16 plenum cover 6 pack PC 031144Model 16 pendantmount kit White PC 030095Model 16 pendantmount kit Black PC 030094DS 16F adjustable tile bridge PC 3232040010Square grille White PC 3232070210Detailed information about the FreeSpace DS loudspeaker family accessories can be found on page two of the FreeSpace DS loudspeaker family comparison guide. How do I change the tap setting for the FreeSpace DS 16F loudspeaker. Remove the grille. Adjust the thumb wheel to the desired setting. Press and secure the grille back into place. This can be accomplished before or after loudspeaker installation. What other loudspeakers can I use with the FreeSpace DS 16F.

The FreeSpace DS 16F is designed to be used on the same loudspeaker line with the surfacemount FreeSpace DS 16S and DS 16SE loudspeakers.The FreeSpace DS 16F also shares the same voicing, installation methods and contemporary styling as the other loudspeakers in the FreeSpace DS family DS 40, DS 100. These shared qualities allow different DS models to be used throughout a facility to maintain a consistent sound quality and overall appearance. What bass loudspeaker is recommended for projects in which extended bass response is needed. In systems that require extended bass response, the FreeSpace DS 16F loudspeaker can be used with a FreeSpace 3 Acoustimass module. For wall mounting, a FreeSpace 3 Acoustimass module can be used with its surfacemount accessory kit. For ceiling mounting, a FreeSpace 3 Series II Acoustimass module can be flushmounted or pendantmounted using a pendantmount kit accessory. What are the construction features of the FreeSpace DS 16F loudspeaker. The grille is made of powdercoated steel. An optional steel back can accessory PC16 plenum cover is available to meet plenumrating for air handling spaces. What is the driver compliment for the FreeSpace DS 16F loudspeaker. Does the FreeSpace DS 16F loudspeaker require active equalization No. It can be used without equalization. However, performance can be maximized by using the recommended Bose loudspeaker equalization resident in select Bose electronics, or by using other equipment with parametric equalization. A highpass filter at 80 Hz is required for general use if the recommended equalization is not used. What Bose electronics can provide the loudspeaker equalization Bose recommends for the FreeSpace DS 16F loudspeaker. Bose Professional Systems loudspeakers and electronics are designed to deliver years of superb performance in demanding applications. Detailed information about our product warranty is available on our website. What standards does the FreeSpace DS 16F loudspeaker meet.
